Financial Data Analysis

Wireframe Documentation

Front Page

This is the Front page of the Dashboard. It shows all the pages along with page navigation: -

As per the problem statement, we have divided analysis into three sections: -
1. The overview of key financial matrix of the companies.

In this we create KPI and cards to show key financial matrix of the companies sector wise.
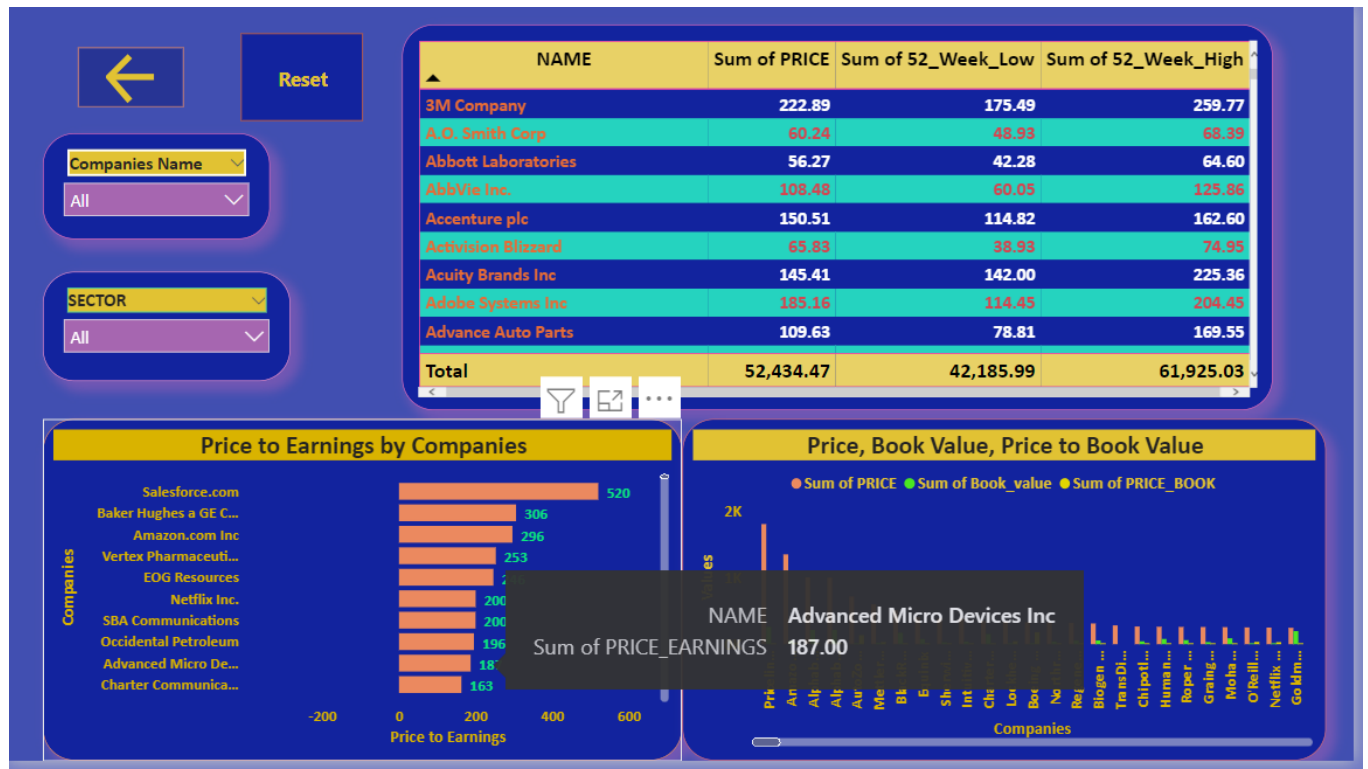

This shows all the details of the Comparative financial terms like Current Market Price along with 52_week high and low, Book Value, Market Capitalization, Earnings before Interest Tax Depreciation and Amortization (EBITDA), and key important Comparative ratios.

2. Comparison1

This is to compare the company's key financial matrix according to different sectors which helps the investors to do the comparative analysis and make their key decisions. As per the case statement analyst can easily analyze the sales and market capitalization of different companies based on their sectors.

3. Comparision2

This is to compare the key financial relative valuation ratios along with current market price and 52_Week high and low share price of the companies from different sectors to make their investment decisions. Price to Earnings shows how much investors wants to pay for 1$ earnings per share of the company. This will helps us to understand the growth prospects of the companies.
